

DAVIDESCU-FILIP OLIVIA-ALEXANDRA

0731885853 ✦ olivia.davidescu.filip@gmail.com ✦ <https://github.com/OliviaDavidescu>
Bucharest, Romania

EDUCATION

Master's Degree in Security and Applied Logic University of Bucharest Faculty of Mathematics and Computer Science	2025 – Present
Bachelor's Degree in Computer Science University of Bucharest Faculty of Mathematics and Computer Science	2023 – 2025
Bachelor's Degree in Mathematics and Computer Science University of Bucharest Faculty of Mathematics and Computer Science	2020 – 2023

SKILLS AND INTERESTS

Programming Languages	C++ (Intermediate), Python (Intermediate), SQL (Intermediate), Java (Beginner), C# (Beginner)
Web Technologies	HTML, CSS, JavaScript, React.js (Intermediate)
Technical Areas	Algorithms, Cryptography, Cybersecurity, Databases, Operating Systems, Web Development
Languages	Romanian (Native), English (C2 – Cambridge Advanced English)
Interests	Cybersecurity, Cryptography, Software Development, Problem Solving, Web Technologies, Blockchain

PROJECTS

Event Management Platform <i>Faculty Project</i>	October 2024 – June 2025
- Technologies: Node.js, React.js, MySQL, Blockchain, AI, Cloud Services - Developed a scalable web platform for event management and promotion - Implemented simulated online payments and NFT-based tickets stored on blockchain using IPFS metadata - Built notification systems for organizers (in-app) and users (Firebase push notifications) - Integrated personalized recommendation features using NLP, vector search (Qdrant), and sentence transformers - Added AI-powered content moderation using ToxicBERT and automatic translation services	
Edge of Equilibrium - Unity Game <i>Team Project</i>	October 2024 – January 2025
- Technologies: Unity, C# - Developed a puzzle-platformer game focused on balance, movement, and obstacle navigation - Implemented gameplay mechanics including checkpoints, power-ups, and physics-based interactions - Collaborated within a development team using version control and task distribution - Published online on itch.io	
Online Library Application <i>Faculty Project</i>	October 2023 – January 2024
- Technologies: C#, React.js, MySQL - Developed a public library management application with separate admin and student functionalities - Implemented book and loan management, student records, and borrowing history tracking - Designed a React.js frontend connected to a MySQL database	

Food Delivery Application

February 2024 – June 2024

Faculty Project

- Technologies: Java, MySQL
- Developed a console-based food delivery application simulating customer-side interactions
- Implemented account creation, menu browsing, and shopping cart management
- Managed persistent data storage using MySQL

Cultural Events Application

October 2022 – June 2023

Faculty Project

- Technologies: HTML, CSS, JavaScript, React.js, Node.js, Express, MySQL
- Developed a web application for planning and managing cultural and artistic events
- Integrated Weather API, Google Maps API, multilingual support (RO/EN), and personalized calendar features
- Implemented backend services using Express.js and Sequelize ORM with MySQL database integration
- Designed the frontend using React.js and Material-UI

EXPERIENCE

Participant – Offensive Security Seminar,

Faculty of Mathematics and Computer Science, University of Bucharest

January 2026 – February 2026

- Participated in practical offensive security exercises involving virtual machine exploitation and attack reporting
- Completed challenges including BSides Vancouver 2018, Lampiao, and Lazysysadmin on VulnHub
- Developed skills in penetration testing, cybersecurity, and technical documentation

Dataset Annotation Contributor,

Faculty of Mathematics and Computer Science, University of Bucharest

February 2025 – June 2025

- Annotated audio and video datasets used to evaluate AI models for automatic lyric and speech recognition through lip reading
- Collaborated with AI master's students to improve dataset quality and annotation consistency
- Developed attention to detail, data processing, and teamwork skills

Tutor,

Faculty of Mathematics and Computer Science, University of Bucharest

October 2021 – June 2022

- Conducted supplementary tutoring sessions for undergraduate students in Linear Algebra and Scientific Computing
- Prepared interactive teaching materials adapted for complex mathematical concepts
- Strengthened communication, problem-solving, and presentation skills
